Applicants' amendment filed September 23, 2005, has been received and entered. Claims 1-22 have been canceled. Claims 23 and 24 are pending.

Election/Restriction

Election was made without traverse in Paper No. 11, to group I, drawn to a substantially pure nucleic acid sequence encoding a serotonin-gated anion channel.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As indicated previously, claims 23 and 24 are allowed. While serotonin gated channels were known in the art, the specific sequences now encompassed by the claimed invention were

sequences disclosed encode a protein which can be differentiated from other known serotonin gated channels by its selectivity for anions. The cancellation of the other claims has rendered the remaining rejections of record moot.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
